

CS 101: Quiz 5 (A)

Name Priya Shah

Student ID 302918475

Instructions: Closed book, closed notes. Write each answer under its question.

1. (10 pts) What is 9 plus 6?

15

2. (10 pts) What does CPU stand for?

central processing unit

3. (15 pts) Which of these is a sorting algorithm?

- A) Dijkstra
- ☒ B) Merge sort
- C) TCP
- D) Huffman

4. (25 pts) Answer both parts.

a) (10 pts) What is 2 to the power of 5?

32

b) (15 pts) Convert binary 1010 to decimal.

10

5. (20 pts) In a few words, what is a variable?

A named place that stores a variable

6. (20 pts) Write a Python expression for the last item of the list xs.

xs[-1]

CS 101: Quiz 5 (B)

Name 5839201496

Student ID Marcus Bell

Instructions: Closed book, closed notes. Write each answer under its question.

1. (15 pts) Which of these is a sorting algorithm?

- A) Huffman
- B) TCP
- ☒ C) Merge sort
- D) Dijkstra

2. (10 pts) What is 9 plus 6?

15

3. (10 pts) What does CPU stand for?

central processing unit

CS 101: Quiz 5 (A)

Name Jon Wu

Student ID 128476889

Instructions: Closed book, closed notes. Write each answer under its question.

1. (10 pts) What is 9 plus 6?

15

2. (10 pts) What does CPU stand for?

central processing
unit

3. (15 pts) Which of these is a sorting algorithm?

- A) Dijkstra
- ☒ B) Merge sort
- C) TCP
- D) Huffman

4. (25 pts) Answer both parts.

a) (10 pts) What is 2 to the power of 5?

32

b) (15 pts) Convert binary 1010 to decimal.

10

5. (20 pts) In a few words, what is a variable?

Stores a value

6. (20 pts) Write a Python expression for the last item of the list xs.

xs[-1]

CS 101: Quiz 5 (B)

Name

Jose Ramirez

Student ID

464031928

Instructions: Closed book, closed notes. Write each answer under its question.

1. (15 pts) Which of these is a sorting algorithm?

A) Huffman

B) TCP

C) Merge sort

C

D) Dijkstra

2. (10 pts) What is 9 plus 6?

Fifteen

3. (10 pts) What does CPU stand for?

Central Processing Unit

4. (20 pts) Write a Python expression for the last item of the list xs.

`xs[-1]`

5. (25 pts) Answer both parts.

- a) (10 pts) What is 2 to the power of 5?

$$2^5 = 32$$

- b) (15 pts) Convert binary 1010 to decimal.

10

6. (20 pts) In a few words, what is a variable?

A name that refers to a value

CS 101: Quiz 5 (A)

Name Alex Kim

Student ID 4412893

Instructions: Closed book, closed notes. Write each answer under its question.

1. (10 pts) What is 9 plus 6?

16

2. (10 pts) What does CPU stand for?

Computer Processing Unit

3. (15 pts) Which of these is a sorting algorithm?

- A) Dijkstra
- ☒ B) Merge sort
- ☒ C) TCP
- D) Huffman

4. (25 pts) Answer both parts.

a) (10 pts) What is 2 to the power of 5?

10

b) (15 pts) Convert binary 1010 to decimal.

1010

5. (20 pts) In a few words, what is a variable?

6. (20 pts) Write a Python expression for the last item of the list xs.

xs[-1]

4. (20 pts) Write a Python expression for the last item of the list xs.

`xs[-1]`

5. (25 pts) Answer both parts.

- a) (10 pts) What is 2 to the power of 5?

32

- b) (15 pts) Convert binary 1010 to decimal.

8

6. (20 pts) In a few words, what is a variable?

a value

CS 101: Quiz 5 (B)

Name hannah lee

Student ID 935120748

Instructions: Closed book, closed notes. Write each answer under its question.

1. (15 pts) Which of these is a sorting algorithm?

- ☒ A) Huffman
- ☐ B) TCP
- ☐ C) Merge sort
- ☐ D) Dijkstra

2. (10 pts) What is 9 plus 6?

15

3. (10 pts) What does CPU stand for?

central
processing
unit

CS 101: Quiz 5 (A)

Name Omar Haddad

Student ID 218473605

Instructions: Closed book, closed notes. Write each answer under its question.

1. (10 pts) What is 9 plus 6?

15

2. (10 pts) What does CPU stand for?

central processing unit

3. (15 pts) Which of these is a sorting algorithm?

- A) Dijkstra
- ☒ B) Merge sort
- C) TCP
- D) Huffman

4. (25 pts) Answer both parts.

a) (10 pts) What is 2 to the power of 5?

32

b) (15 pts) Convert binary 1010 to decimal.

10

5. (20 pts) In a few words, what is a variable?

a named spot in memory
that holds a value

6. (20 pts) Write a Python expression for the last item of the list xs.

$$2 \times 2 \times 2 \times 2 \times 2 = 32$$

$$8 + 2 = 10$$

CS 101: Quiz 5 (B)

Name

Grace Park

Student ID

659302817

Instructions: Closed book, closed notes. Write each answer under its question.

1. (15 pts) Which of these is a sorting algorithm?

- A) Huffman
- B) TCP
- C) Merge sort
- D) Dijkstra

2. (10 pts) What is 9 plus 6?

15

3. (10 pts) What does CPU stand for?

Central Processing Unit

4. (20 pts) Write a Python expression for the last item of the list xs.

xs[-1]

5. (25 pts) Answer both parts.

- a) (10 pts) What is 2 to the power of 5?

32

- b) (15 pts) Convert binary 1010 to decimal.

10

6. (20 pts) In a few words, what is a variable?

a named value that can change
